HERD HEALTH
PROTOCOL TEMPLATE

A **Herd Health Protocol** is a document developed through collaboration between a producer and veterinarian within an established Vet-Client-Patient-Relationship (VCPR). A protocol is used to determine an anticipated medical need for a prescription or Extra-Label Drug Use (ELDU), but can not be used in place of a prescription for the purpose of purchasing animal health products.

DATES PROTOCOL IS VALID FOR	
OPERATION INFORMATION (# of head, contact info, operation type/location, class of cattle, calving period)	
VETERINARY CLINIC INFORMATION	
VETERINARIAN SIGNATURE	

ANNUAL VACCINATION PROTOCOL
